

PHD DEFENSES / HABILITATIONS

PhD defenses

Benjamin Large (SORG team), November 14, 2019

"Selective activation of naphthalenes and synthesis of extended polycyclic architectures"

Kevin Dedecker (MIM team), March 25, 2019

"Multifunctional Hybrid Materials for the Capture and Detection of Volatile Organic Compounds: Application to Preventive Conservation of Heritage Objects"

Effrosyni Gkaniatsou (MIM team), January 25, 2019

"Development of new enzymatic immobilization matrices based on Metal-Organic Frameworks (MOFs) for the catalytic degradation of environmental pollutants"

Anne-Sophie Marques (SORG team), December 20, 2018

"Development of new domino reactions initiated by iso-Nazarov cyclization for the synthesis of polycyclic compounds"

Amandine Boulmier (MIM team), November 5, 2018

"Synthesis of hybrid polyoxometalates and study of their biological and optical properties"

HDR defenses

Bruce Pegot (SORG team), July 2, 2019

"Fluor and ionic liquids"
