INDUSTRIAL CONTRACTS

Pre-maturation and maturation projects

Sébastien Floquet (MIM group) is developing a maturation project, APIMONA, with the support of SATT Paris-Saclay. The APIMONA project deals with feed supplements for bees.
To know more.

Clémence Sicard (MIM group) is developing a maturation project, EVAC, with the support of SATT Paris-Saclay. The EVAC project proposes a new generation adjuvant that is totally absorbable, a real alternative to the aluminum salts used for inactivated vaccines.

Industrial partners hosted in ILV

ILV houses a research laboratory of the company SQY therapeutics. This company, based in Montigny le Bretonneux, implements aimed R&D programs for Duchenne muscular dystrophy and other genetic diseases for which no satisfying treatment exists yet.

Industrial partners of ILV

The EPI group has collaboration agreements with numerous industrial partners, including SOFRADIR, EDF, TOTAL, Air Liquide, Thales, III-V lab, UMS AVENI, Safran, Saint Gobain, Leoni, Egide, Valeo and Surys.

The SORG Group has established collaboration agreements with the SANOFI Group, SYMRISE, Scent and Care Division (Clichy-La-Garenne) and International Flavors and Fragrances (Neuilly).

The MIM group has received financial support for 2019, renewable in 2020, from the company "Famille Michaud Apiculteurs" through the "Lune de Miel" foundation. This support will help to develop a project to study the effects of molybdenum for bees against the harmful effects of pesticides.
