Institut Lavoisier de Versailles

MIM

Our team

The MIM team, lead by Anne Dolbecq and Nathalie Steunou, has currently 18 permanent senior scientists and ~ 15 young scientists (PhD students, Postdocs and trainees).

Associate professors / Professors:

Emmanuel Cadot (Professor), Eddy Dumas (Associate professor), Sébastien Floquet (Professor), Alexandra Jourdain (Associate professor), Maxime Laurans (Associate professor), Marc Lepeltier (Associate professor), Pierre Mialane (Professor), Olivier Oms (Associate professor), Catherine Roch (Associate professor), Clémence Sicard (Associate professor), Corine Simonnet (Professor), Nathalie Steunou (Professor)

CNRS researchers:

Anne Dolbecq (Director of research), Clément Falaise (Researcher), Nathalie Guillou (Researcher), Mohamed Haouas (Researcher), Nada Savic (Researcher)

Research engineer:

Nathalie Leclerc

PhD students :

Damien Audibert, Gabriela Boc, Julie Brunel, Nina-Francia Capistrano, Jérémy Delafoulhouze, Julia Krystyanczuk, Maxime Lajoye, Coline Leroux, Irène Mangialomini, Navaneeth Narayan, Abdur Rehman Sheikh, Arnaud Tillet

Postdoctoral students:

Amal Chaabani (ATER), Thi Thiet Vu, Maria El Khoueiry, Alisha Khan

Affiliated researchers:

Isabelle Gérard (Associate professor), Caroline Mellot-Draznieks (Director of research; CNRS Collège de France, Paris)

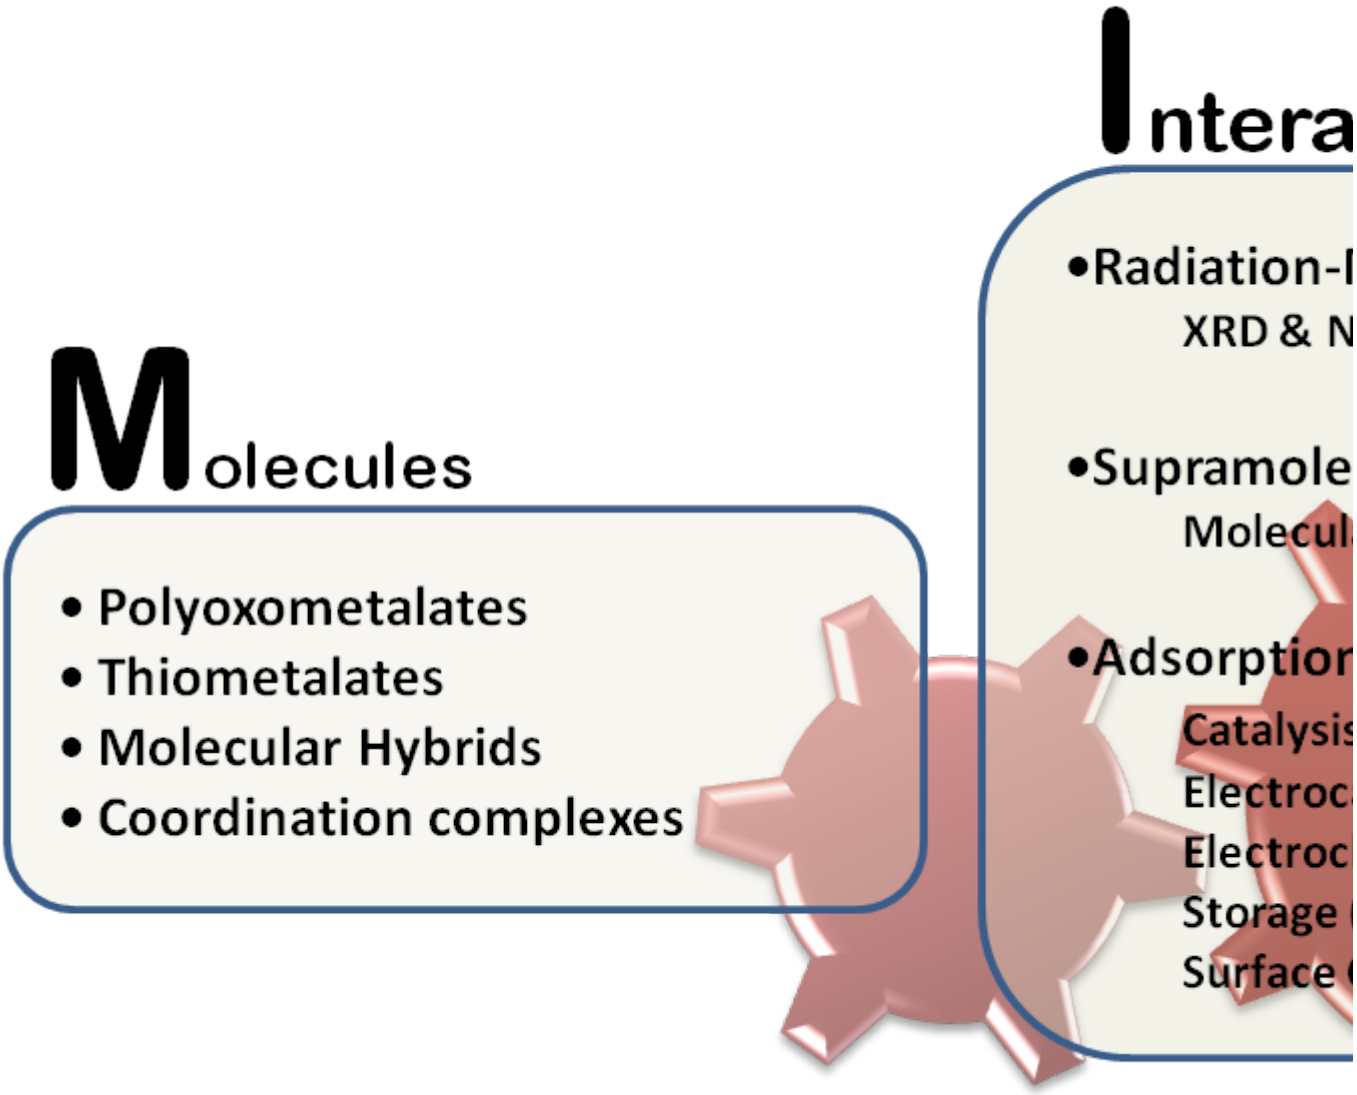

Research areas

The activity of the MIM team merges various expertises from the synthesis of new inorganic molecules or materials to the deep studies of their properties using specific methods (NMR spectroscopy, X-ray diffraction...). Three axis are developped :

- Molecules@MIM

- Interactions@MIM

- Materials@MIM

The MIM team collaborates with numerous research teams across the world.
